

## PROJEC TPLANNING PHASE

### PROJECT MILESTONE

Date	12 November 2022
Team ID	PNT2022TMID21021
Project Name	Emerging methods for early detection of forest fires
Maximum Marks	4Marks

S.No	MILESTONE	DESCRIPTION	DURATION	WORKING STATUS
1	Project Objectives	Project objectives are things you plan to achieve at the end of your project. This might include deliverables and assets, or more intangible objectives like increasing productivity or motivation.	1WEEK	COMPLETED
2	Project Flow	It is a visual aid to understand the methodology you're using to manage the project. The diagram shows the interdependent and parallel processes over the course of the project's life cycle.	1WEEK	COMPLETED
3	Pre-Requisites	Pre-requisites are the requirementlevel needed for the execution of the different phases of a project.	1WEEK	COMPLETED
4	Prior Knowledge	Prior knowledge is defined as the knowledge one has learned before about a particular topic.	1WEEK	COMPLETED
5	Data Collection	It is the process of gathering and measuring information on targeted variables in an established system, which is then enables one to answer relevant questions and	2WEEKS	COMPLETED

		evaluate the outcomes.		
6	Image Processing	It is a method to perform some operations on an image, in order to get an enhanced image or to extract some useful information from it.	1WEEK	COMPLETED
7	Model Building	It is the process of developing a probabilistic model that describes the relationship between the dependent and independent variables.	2WEEKS	IN PROGRESS
8	Video Analysis	It is also known as video analysis or video analytics (VA). It is the capability of automatically analyzing the video to detect and determine temporal and spatial events.	1WEEK	COMPLETED
9	Train CNN Model on IBM	A network architecture for deep learning which learns directly from data by eliminating the need for manual feature extraction. CNNs are particularly useful for finding patterns in images to recognize objects, faces, and scenes.	2WEEKS	IN PROGRESS
10	Ideation Phase	Ideation is the process where you generate ideas and solutions through sessions such as sketching, prototyping, brainstorming and a wealth of other ideation techniques.	1WEEK	COMPLETED

11	Project Design Phase	Project design is an early phase of a project where the project's key features, structure, criteria for success, and major deliverables are planned out. The aim is to develop one or more designs that can be used to achieve the desired project goals.	1WEEK	COMPLETED
12	Project Planning Phase	In the Planning Phase, the Project Manager works with the project team to create the technical design, task list, resource plan, Communications plan, budget, and initial schedule for the project, and establishes the roles and responsibilities of the project team and its stakeholders.	1WEEK	COMPLETED
13	Project Development Phase	Project development is the process of planning and allocating resources to fully develop a project or product from concept to go-live.	4WEEKS	IN PROGRESS
